

# THIS IS COLIVING HUB

## Vision

By being the leading coliving network, we are creating a world where everyone can find a home anywhere, collaborate with others and thrive from it.

## Mission

To enable and empower people around the world to create and use coliving spaces.

## Story

Coliving Hub was started by 5 founders who all owned Coliving spaces and wanted to share their expertises and knowledge to new comers in the industry. They developed the Coliving Hub as a network for coliving space operators in 2018.

They started offering webinars with expert speakers from the coliving industry and soon felt the need of creating the Global Coliving Conference to involve more players such as architects, investors and developers who work closely with the industry. After the success of the 1st conference in 2019, Coliving Hub started offering more products and services to its members in the entire spectrum – from starting a Coliving space to scaling one.
